A Novelty in trimmings carries out the circular idea, one edge being very full and the other straight; this is shown in embroidered tulle and Baltimore & Ohio Southnet, crocheted passementerie with cord and jet, mohair braid with insertion effects, moire ribbons and galloons profusely wrought with cabochons, sequins, and paillettesspangles-of jet. A brilliant effect is gained by mingling iridescent paillettes with those of jet,green and black being very popular. All jewel colors are seen mingling with metal threads, and white guipure laces are thus wrough; there is also an effort to introduce leather bands studded with many colored beads and brilliantly embroidered. -From "Reviw of Fashions,"in Demorest's Magazine for April.

—The Lord's Day union has been or-ganized in India. It was suggested by our Rev. F. W Warne, of Calcutta, and is designed to agitate in favor of Sunday observance.

—Rev. Henry A. Adams, formerly rector of St. Paul's Episcopal church of Buffalo, and later of the Church of the Redeemer of New York, has joined the Roman Catholic church.

-Mrs. George William Curtis has established a free scholarship fund in memory of her husband in the Staten Island scademy. It is the proceeds of the edition of "Prue and I," published last Christmas.

—A bill providing for freedom of pub-lic worship has been introduced in the Hungarian parliament. It concedes the right of everyone to choose the form of religion each may prefer. Its practice, within the requirements of public order and morality, is guaranteed.

-In one hundred and seventy years after the death of Christ the whole Bible had been translated into Latin by some unknown author into what is now known as the old italic version. By the year 200 it was extant in Greek, Syriac and Latin, and by the ninth century in thirteen languages. A conference has been suggested

of Congregationalists, Christian or Disciples, and Free Baptists, to propose a basis for a practical alliance be-tween the three denominations, the proposed basis to be submitted to the representative bodies of each denomi-nation for discussion and possible rati-

Take a quarter of a pound of English mustard, one quart of good vinegar, one cupful of brown sugar, one-half cupful of flour. Flowers for the Table. A woman who is noted for her sensible and practical ideas recently made a floral device for the center of the table that is worthy of commendation. She secured a woven willow-basket of suitable size and enameled it in white and gold. Through the meshes picotedged ribbon in a medium shade of green was interwoven. In the basket was placed a shallow earthen pan containing perfectly clean, well-washed sand. In this sand the stems of the flowers were thrust, making a border, while in the middle a small and handsome fern in an earthen pot was buried. Several earthern pans were provided, and in these various plants were set and allowed to become well established. Any one of these will bear three or four days in the dim light of the dining-room without suffering; they are then taken out, put into the

conservatory, and others are brought in. The wicker-basket is easily kept in order, is light, convenient and, having a foundation of white and gold, may be dressed with any ribbon or silk that suits the decoration of the table or the apartment. As a general ntility trimming for the table it has the merit of being inexpensive, dainty and in every way manageable. With various modifications this idea can be utilized for many of the floral devices that the modern dinner or lunch-table may require .- N. Y. Ledger. The Omnivorous Cow.

The goat has long been regarded as

the most omnivorous animal that roams, but modern investigation may rob that sportive animal of its laurels and transfer them to the broad brow of the humble cow. The men at the various slaughter houses and abbatoirs have learned to regard the cow's stom-ach as a veritable prize bag. It is no uncommon occurrence to find the most surious things in them, and sometimes there is a vast collection of bric-a-brac in its mysterious folds. An animal recently killed at the West Philadelphia abbatoir had a masonic mark, a door hinge and a part of a rat trap in its stomach, while another had a small medicine bottle and part of a croquet

Botanical Oddities.

Those who have given any particular attention to the study of botanical od-dities know that the Brazilian flower dities know that the Brazilian flower known as the "running antelope" is so called because its white petals have a series of well-defined dark-colored lines and dots, in which the imagination can readily trace the form of an antelope, with the limbs outstretched and head thrown back, seemingly fleeing for its life. In the "caricature plant" one species has the initiative form on the petals, and another has it outlined in the ribs and shading of the leaves. This lastmentioned curiosity bears a remarkably well-executed likeness of the duke of Wellington, and has on that account been named "Arthur and ount been named "Arthor e
